

BACKGROUND KNOWLEDGE CD

Thank you for ordering the **Background Knowledge CD**. We have thoroughly tested the CD on MS Windows 98, 2000 and XP. Below is the technical information to go with the CD.

In order to read the CD contents you need to have **ADOBE Acrobat Reader** installed on your computer. The versions of Acrobat Reader required are 4.0 or 5.0. In case you do not have these versions we have included version 5.0 on the CD.

In order to install Acrobat Reader go to the bottom of the opening page of the CD and click where it tells you to install Acrobat 5.0 and then follow the instructions.

If your computer does not automatically load the CD contents you will need to open the CD through a web browser (e.g. Netscape, Internet Explorer). Open your browser and then click on File, followed by Open. Browse to the Drive containing the CD (normally Drive D:\). Click on the file named **index.htm** to open.

In the unlikely event that the CD does not work after following the above instructions please return it to the Institute office within 7 days and we will refund your payment.

Please note that as the main contents of the CD are in Adobe Acrobat format the contents are not navigable by clicking but must be read through as on the printed page.

We hope you find the CD useful.
